INTRODUCTION

The Nigerian Society of Biochemistry and Molecular Biology (NSBMB) was established to, among other mandates, promote education, research and development in the fields of Biochemistry and Molecular Biology. As a society, this core mandate is pursued through collaborative interactions amongst its members and with other institutions with similar interests both within and outside Nigeria. The organization of seminars, workshops and conferences serves therefore to rally interests groups for cross fertilization of ideas.

The central theme of the 38th NSBMB scientific conference - **Biochemistry and Molecular Biology: Tools for Innovation, Entrepreneurship and Sustainable Development** - was conceived at a no better time than now where humanity is once again faced with the challenges of emerging diseases and the need to sustain the world economy through novel approaches to science and technology. Going forward, the tools of Biochemistry and Molecular biology remain indispensable in the current futuristic drive for entrepreneurial skills among the youth for sustainable development.

Sub-Themes:

- i. Bioinformatics and Nanotechnology
